Join us on EchoLink

With our Hurricane Season upon us, lightning events, and prolonged outage, costly damage that these lightning storms can inflict are very frustrating. So, in the interest of not getting frustrated, I will be disconnecting the Echolink reflector when lightning hits come within six miles of my location. To support that practice I have installed sensor apparatus that monitors direction, range, intensity, and the number of lightning events taking place.

Tuesday morning breakfast at **Junior and Rosie's** continues to be a popular spot to be at 7:30 am. We are holding our own with a special row of tables to seat the crowd of

10 or so Ham's that show up for the great food at great prices and ham radio discussions! Rosie has even added an "EARS omlette" to make us all feel welcome!

Mystery Ham of the Month

Can anyone figure out who this is? Judging by the equipment in the background, I'd say this person is about as old as I am! He is a current (and long time) member of EARS and has served in many roles of responsibility in the club over the years. Clue: He is a "snowbird" and has been known to show up for breakfast on Tuesdays, and has done a fine job as net control on the Tuesday 2

meter chat net. Chirp chirp!
